Honders Inc. offers a complete home or office AC Remote Control System for the Commodore PET or CBM. Virtually any electrical device can be switched on or off and lamps can be dimmed or brightened under computer control. No additional wiring is needed. The computer sends the signals to the power line for distribution. Up to 256 points can be controlled. This system has unlimited uses for security and energy control systems.

The basic package includes a plug-in module to the Commodore's 2nd cassette port, three remote power controllers and a complete cassette software package for demonstrations and applications. Additional modules for lamps or appliances are $16.95 each.

INSTALLATION:

The PET AC Remote Controller requires no special wiring or complicated installation. Simply plug the command console into your wall outlet in any desired location in your home. Plug the PET connector into the 2nd cassette port. Plug each lamp or appliance into the appropriate module and then plug that module into any wall outlet. By setting the house code and unit code on each module, you are now ready to operate the system.

The PET AC Remote Controller can also be used by itself as a freestanding unit not connected to a PET!

WHAT DO YOU GET?

COMMAND CONSOLE

Its keyboard permits remote control operation of lights or appliances in up to 16 separate locations. Plugs into any 120 volt AC wall outlet and transmits command signals over the electrical wiring throughout your home or office. The command console translates the PET'S signals into a format that the remotes will accept.

Construction: Black with wood-grained finish high impact plactic. Hinged cover. 4¾" x 3½" x 2½". Wt. 10 oz. Electrical: 6 ft. cord to PET 2nd cassette port. 110-120 volts AC, 60 HZ.

APPLIANCE MODULE

Receives signals from the command console to turn an appliance on or off (e.g.: tv, stereo, fan, etc.). Maximum appliance ratings: Resistive load--15 amps, motor load--⅓hp, incandescent lamp--500 watts.

Construction: High impact brown plastic. 2" x 2¾" x 1¾". Wt. 6 oz. Electrical: Plugs into standard wall outlet. Has receptacle for 2-prong appliance plug.

TWO LAMP MODULES

Will control any incandescent lamp rated up to 300 watts from control signals received from command console. Functions include on and off, brighten and dim.

Construction: High impact brown plastic. 2" x 2¾" x 1½". Wt. 4 oz. Electrical: Plugs into standard wall outlet. Has receptacle for 2-prong lamp plug.

ALSO OPTIONALLY AVAILABLE FOR $16.95

WALL SWITCH MODULE

Receives signals from the command console to control lights or lamps normally operated by a wall switch up to 500 watts. Installs just like any normal wall switch dimmer. Functions include on and off, brighten and dim.

Construction: High impact brown plastic and metal. 1¾" x 4" x 1½". Wt. 4 oz. Electrical: 110-120 volts AC, 60 Hz.

The complete package may be ordered for $179.00 from HONDERS INC., Kennel Road, Cuddebackville, N.Y. 12729. Telephone (914) ~~754-7106 or (212) 765-0815~~ 343-4880. C.O.D. or major credit cards are accepted.

THE APPLICATIONS FOR THE AC REMOTE CONTROLLER ARE LIMITED ONLY BY YOUR IMAGINATION! AND IT'S EASY TO USE!

FOR SECURITY PURPOSES, YOU CAN CONTROL ONE LIGHT, OR A WHOLE BANK OF LIGHTS, TO GO ON, OFF, DIM, BRIGHTEN -- AT THE SAME TIME, OR IN A RANDOM FASHION. YOU CAN GIVE THE APPEARANCE OF SOMEONE WALKING THROUGH A HOME (OR WAREHOUSE, OR FACTORY) FROM ROOM TO ROOM, TURNING LIGHTS ON AND OFF AS THEY WALK.

OR PERHAPS YOU WOULD LIKE YOUR COFFEE POT TO AUTOMATICALLY GO ON AT A CERTAIN TIME EACH MORNING AND EVENING, OR TURN ON THE VENTILATION SYSTEM 30 MINUTES BEFORE YOUR EMPLOYEES ARRIVE AT THE OFFICE (AND TURN IT OFF AT THE WORK DAY'S END). OR WATER YOUR LAWN DURING YOUR VACATION. THE APPLICATIONS CAN GO ON AND ON. ANY APPLIANCE UP TO FIFTEEN AMPS CAN BE CONTROLLED. AND UP TO 256 LAMPS OR APPLIANCES CAN BE CONTROLLED AT ONE TIME!

THE SOFTWARE ALLOWS YOU TO ENTER A LIST OF NAMED DEVICES TO BE CONTROLLED. THE PROGRAM THEN ASKS FOR DATE AND TIME INFORMATION TO BE USED IN CONTROLLING THE DEVICE. THE SOFTWARE ALSO ALLOWS YOU TO SPECIFY THE PERCENTAGE OF DIMMING OR BRIGHTENING OF LIGHTS DESIRED. AN ADDITIONAL COMMAND ALLOWS A LISTING OF ALL DEVICES AND TIMING COMMANDS ENTERED. SO THE USER CAN SEE WHICH LIGHTS AND/OR APPLIANCES ARE SCHEDULED TO BE CONTROLLED, AND TO WHAT DEGREE.

THE DATE AND TIME CAN BE INITIALIZED. FROM THEN ON, THE COMPUTER WILL KNOW THE DATE AND TIME, SO EVEN FOR EXTENDED LENGTHS OF TIME, YOUR COMPUTER CAN CONTROL THE DEVICES AS YOU SPECIFIED.

THE PROGRAM IS WRITTEN FOR EASY END-USER USE. PLUS A DETAILED BOOKLET IS INCLUDED.

IF YOU HAVE ANY QUESTIONS PLEASE CALL US AT THE STORE. WE'RE OPEN FROM 12 UNTIL 5 DAILY AND 10 'TIL 2 ON SATURDAYS. BETTER YET, IF YOU CAN , DROP IN FOR A DEMONSTRATION !

LOTS OF FOUR OR MORE: $120.00 EACH
